February 21, 2017

Re: Radon Re-Evaluation
February 2017.

Dear Mr. Willoughby.

Attached are the laboratory results for the radon re-evaluation recently conducted at the New Canaan Public Schools.

Testing was conducted from February 7-10, 2017 at the below listed schools. As reported in attached laboratory results, samples from all schools returned results below the Environmental Protection Agency action level of 4 pCi/l.

- New Canaan High School
- Saxe Middle School
- East School
- South School
- West School

The radon samples were deployed and collected by a team from Hygenix, Inc, that was under my supervision. I am certified by the National Radon Safety Board (Certification Number 6SS0041), and listed on the Connecticut Department of Public Health list of "Radon Measurement Professional". This testing program meets the requirements of Connecticut General Statute Section 10-220(d) for radon testing at public schools.

This letter should be kept in the main offices of each school so it is available to parents, staff, and other interested parties. If you have any questions or require additional information, please call me at (203) 324-2222.

Regards,

Ted Tio, MS, CIEC
Hygenix, Inc
