

# Standards Based Grading

New Canaan  
Board of Education  
2018

# Board of Education Goal

GOAL 1. Increase student learning as measured by multiple and varied assessments to assure all students graduate prepared for a dynamic and complex global society.

OBJECTIVE 3- Review and update alignment between new national and state frameworks in science, technology, engineering and math and local STEM initiatives.

- a. Continue to design, implement, evaluate, and revise STEM programs K-12.
- b. Implement Next Generation Science Standards (NGSS) K-8.
- c. Continue to research and design a plan for NGSS for grades 9-12 in alignment with K-8 program.
- d. Analyze and update BOE on Standard Based Grading Practices in Science in grades 6-8.

# What is the purpose of grades?

Grades are a(n):

- measurement and feedback tool.
- system used to communicate academic progress to students, parents and teachers.
- indicator of what students understand and how to improve.

# How is student progress assessed at Saxe?

Rubrics  
Participation  
Portfolios  
Tests  
Discourse  
Projects  
Collaboration  
Behavior  
Homework  
Labs  
Reports  
Work habits  
Reflections  
Notebooks

# What is standards based grading?

“ Standards based grading is a system of assessing and reporting that describes student progress in relation to standards.” -Thomas Guskey

- Represents depth of understanding of a standard
- Growth model- Measures a student's current level of understanding
- Separates academic and non-academic elements

# How is student progress reported in Power school?

## Traditional Grading

Course	Q1	Q2	Q3
Lang Arts 7	B+	B	A-

## Standards Based Grading

Standards	Q1	Q2	Q3	Q4
<b>S.S Science Standards</b> <i>(No Grade Collected)</i>				
<b>S.S.C Science Content Knowledge</b> <i>(No Grade Collected)</i>				
S.S.C7.7 C: Characteristics of Matter	3			
S.S.C7.8 C: Atoms and Periodic Table		3.5		
S.S.C7.10 Structure and Function - Cells			3.5	
S.S.C7.18 Structure and Properties of Matter		3		
S.S.C7.19 Chemical Reactions		3		
<b>S.S.SEP Scientific and Engineering Practices</b>	3			
S.S.SEP.1 Asking Questions and Defining Problems		3		
S.S.SEP.2 Developing and Using Models		3.25		
S.S.SEP.3 Planning and Carrying Out Investigations	3.5			
S.S.SEP.4 Analyzing and Interpreting Data			3.5	
S.S.SEP.8 Obtaining, Evaluating, and Communicating Information	3.5			
<b>S.S.WS Habits of Success</b>	3.5			
S.S.WS2 HoS: Active Learning	4		3	
S.S.WS3 HoS: Collaboration	4	3.5	3	
S.S.WS4 HoS: Self Management		4		

Standards	Q1	Q2	Q3	Q4
<b>S.S Science Standards</b> <i>(No Grade Collected)</i>				
<b>S.S.C Science Content Knowledge</b> <i>(No Grade Collected)</i>				
<b>S.S.C7.7 C: Characteristics of Matter</b>	3			
<b>S.S.C7.8 C: Atoms and Periodic Table</b>		3.5		
<b>S.S.C7.10 Structure and Function - Cells</b>			3.5

<b>S.S.SEP.2 Developing and Using Models</b>		3.25		
<b>S.S.SEP.3 Planning and Carrying Out Investigations</b>	3.5			
<b>S.S.SEP.4 Analyzing and Interpreting Data</b>			3.5	
<b>S.S.SEP.8 Obtaining, Evaluating, and Communicatin5g Information</b>	3.5			
<b>S.S.WS Habits of Success</b>	3.5			
<b>S.S.WS2 HoS: Active Learning</b>	4	3	3	
<b>S.S.WS3 HoS: Collaboration</b>	4	3.5	3	
<b>S.S.WS4 HoS: Self Management</b>		4		

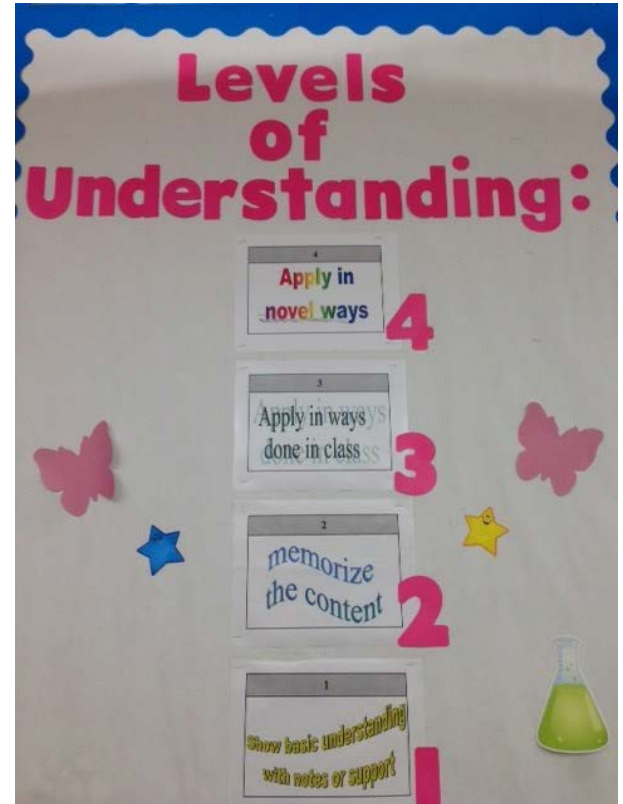

# What do the scores 1-4 mean?

4.0: The student demonstrates an in-depth understanding of the material by completing advanced applications of the material.

3.0: The student has mastered the complex, targeted knowledge and skills for the class.

2.0: The student understands the foundational material that supports the targeted learning, but is still working to master the complex material for the class.

1.0: The student is able to demonstrate an understanding of the foundational material for the class with help from the teacher, but still struggles when working independently.

# What do learning progressions look like in science?

Level of Understanding	Disciplinary Core Ideas (Content)	Science and Engineering Practices (SEP)	Crosscutting Concepts (Big Ideas)
4	Demonstrates the ability to apply concepts and/or skills in new and novel ways.		
3	<p><b>Structures and Properties of Matter</b></p> <ul style="list-style-type: none"> <li>Structure and arrangement of atoms and molecules (elements, compounds and mixtures).</li> <li>Structure and arrangement of elements on the Periodic Table.</li> </ul> <p><b>Chemical Reactions</b></p> <ul style="list-style-type: none"> <li>Substances react/don't react chemically based on their characteristic properties.</li> <li>Synthetic materials come from the restructuring of natural atoms/molecules.</li> <li>The total number of atoms does not change in a chemical reaction (law of conservation of mass).</li> </ul>	<p><u>Modeling</u></p> <ul style="list-style-type: none"> <li>Develop and/or use a model (diagram, drawing, simulation, 3D model, analogies, graphs):               <ul style="list-style-type: none"> <li>to predict or describe how an event or process occurs.</li> <li>to match what happens if a variable or component of a system is changed.</li> <li>to describe unobservable mechanisms.</li> <li>to communicate and/or revise your thinking.</li> </ul> </li> <li>Revise a model to show the relationships among variables (observable and unobservable).</li> <li>Evaluate limitations of a model.</li> </ul>	<p><u>Energy and Matter</u></p> <ul style="list-style-type: none"> <li>Matter is conserved because atoms are conserved in physical and chemical processes.</li> <li>Within a natural or designed system, the transfer of energy drives the motion and/or cycling of matter.</li> <li>Energy may take different forms (e.g. energy in fields, thermal energy, energy of motion).</li> <li>The transfer of energy can be tracked as energy flows through a designed or natural system.</li> </ul> <p><u>Structure and Function</u></p> <ul style="list-style-type: none"> <li>Observable and unobservable systems can be visualized, modeled, and used to describe how there is a relationship</li> </ul>

# Example

Standard: ESS2.A: Earth Materials and Systems Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, living organisms, and gravity break rocks, soils, and sediments into smaller particles and move them around. (4-ESS2-1)

**Prompt:** Given a landform (image or video), explain how water shapes landforms.

**Level 4:**

- Predict how the processes of erosion and deposition can affect humans.
- Design a solution to a human problem related to erosion or deposition.

**Level 3:**

- How does water shape landforms?
- How is a landform created by water erosion?
- How is a landform created by deposition?

**Level 2:**

- Define erosion, deposition, and gravity.
- Identify the landforms.

## DOK 1

### Routine Thinking

- Can you recall \_\_\_?
- Can you identify \_\_\_?
- How would you describe \_\_\_?
- What might you include on a list about \_\_\_?
- Can you select \_\_\_?
- How can you find the meaning of \_\_\_?

arrange   calculate   memorize  
measure   name   recognize  
recall   repeat   identify  
illustrate   match   label  
state   list   state

## DOK 2

### Conceptual Thinking

- Can you explain how \_\_\_ affected \_\_\_?
- How would you apply what you learned to develop \_\_\_?
- How would you summarize \_\_\_?
- What do you notice about \_\_\_?
- How would you estimate \_\_\_?
- How could you organize \_\_\_?

compare   classify   categorize  
measure   graph   distinguish  
predict   modify   construct  
organize   infer   summarize  
interpret   make observations

## DOK 3

### Strategic Reasoning

- How is \_\_\_ related to \_\_\_?
- What conclusions can be drawn?
- Can you elaborate on \_\_\_?
- How would you test \_\_\_?
- What evidence supports \_\_\_?
- What would happen if \_\_\_?
- Why is that the best answer?

assess   compare   construct  
apprise   revise   hypothesize  
critique   investigate  
draw conclusions  
develop a logical argument

## DOK 4

### Extended Reasoning

- Write a research paper.
- What information can you gather to support your idea about \_\_\_?
- Write a thesis, drawing conclusions from multiple sources.
- Apply information from one text to another to develop an persuasive argument.

design   connect   prove  
analyze   critique   synthesize  
create   apply concepts

# What does a score of 3 mean in science?

“You are able to apply the information we are doing in class to ways we have practiced.” - Grade 7

“You have met the goal expectation and fully understand the topics you are studying” -Grade 8

“...there is some high ordered thinking and good structure, evidence, and reasoning. It is right before going above and beyond.” -Grade 7

■ Understood ■ Other

# What are some strengths of standards based grading?

## Student

- Learning targets are clearly defined.
- Students can monitor their progress, self assess and goal set.
- Multiple opportunities (available or provided) to meet mastery.

## Parent

- View what their child knows and can do separate from his or her task management skills.
- Identify academic areas where their child needs additional support or where he/she should be pushed to higher levels.

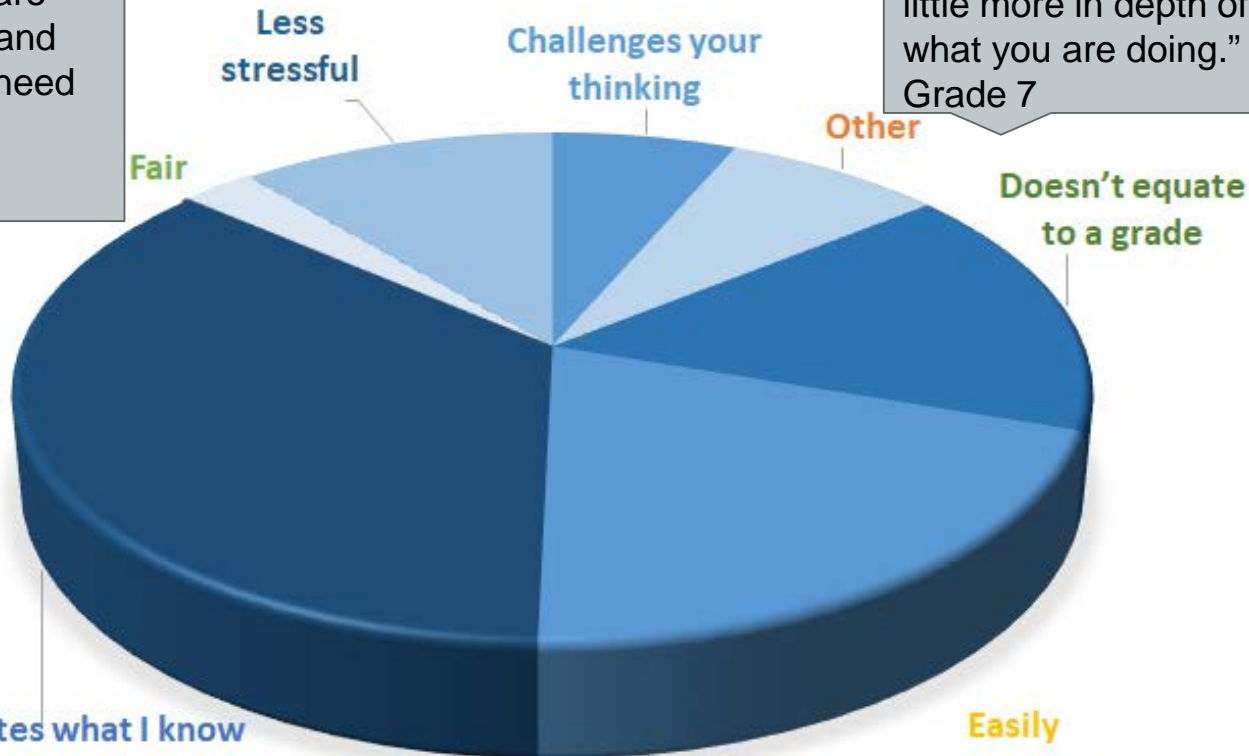

## Teacher

- Focus planning, instruction, and assessment on specific learning targets.
- Provide specific and targeted feedback.
- Know exactly where students stand in their progress toward the learning target and identify what additional supports are needed.
- Work collaboratively.

# What Saxe students identify as strengths?

"I like how it shows exactly what you are doing on a rubric and exactly what you need to improve on."  
-Grade 7

"It makes you think a little more in depth of what you are doing."  
- Grade 7

"there is less pressure in getting tests back and the grading is more about you and the improvements you can make." – Grade 8

"I like that you don't get a score on what you got wrong or right, you get scored on your understanding of what you know." - Grade 6

# What is the history of its implementation in science?

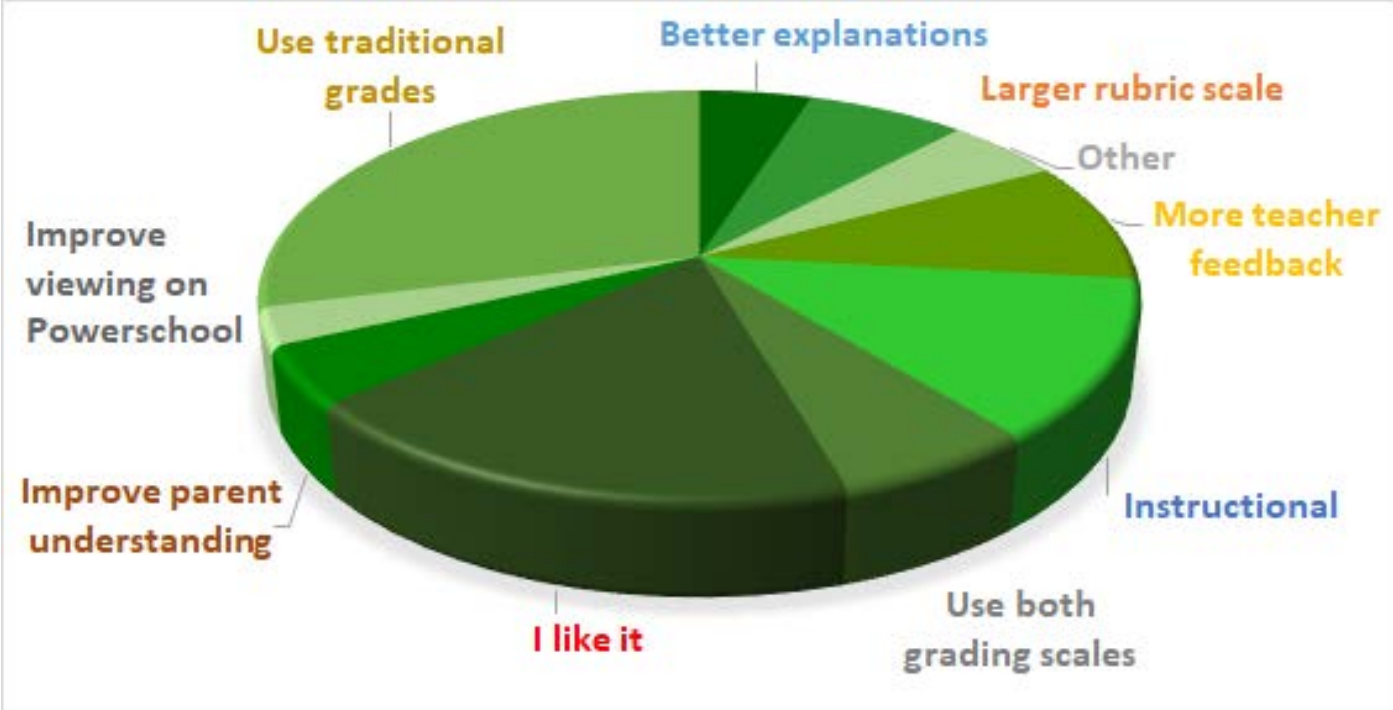

2009-2011	Professional learning and research
2011-2012	Summer work Pilot Grades 6 and 8
2012-2013	Communication and continuation with 2 teachers in grade 6
2013-2014	Growth in number of teachers and grade levels Multi-year roll-out plan was developed and shared
2014-2015	All grade 6 teachers implement
2015-2016	All grade 7 teachers implement
2016-2017	All grade 8 teachers implement Planning for HS transition
2017-2018	Revision to standards and learning progressions due to NGSS

# Why does science use standards based grading?

- Depth of Knowledge (DOK)
- Performance Based Assessment- PBA
- Next Generation Science Standards (NGSS)
- Student Learning Expectations (excerpt below)

	Learning Objective	Instructional Practices	Learning Strategies	Questioning	Student Independence and Interdependence	Monitoring	Differentiation	Feedback	Metacognition
<b>If...</b>	Essential questions and learning objectives are displayed and communicated to students so that <b>students are able to explain both</b> .  Performance expectations require <b>students to think at a higher level</b> .	<b>Students are able to articulate</b> how the new learning applies to situations outside the scope of the lesson.	<b>Student-to-student discourse</b> is purposeful, collaborative, and supports problem-solving of real-world issues.  <b>Students approach</b> problem solving tasks and <b>communicate</b> with	<b>Students pose questions</b> to the educator that are relevant to the learning objective and demonstrate higher order thinking.	Educator provides opportunities for <b>students to collaborate with each other to discuss and apply</b> skills and concepts presented.  Scaffolds allow most <b>students to take</b> <b>ownership</b>	<b>Students self-evaluate</b> performance or work based on specific criteria.	<b>Students respond to</b> differentiation and are successful in meeting learning objectives.	Feedback to <b>students about the quality of their work/performance is timely, specific, accurate and reinforces effective learning strategies</b> .	Educator explicitly instructs about and models metacognition to help <b>students think more deeply</b> about the discipline.  Opportunities are provided for <b>students to reflect about and share</b> their <b>growth-related</b>
